

Voyager Overhead Track System - Surveying & Installation

Course Background

Content:

This newly developed course provides comprehensive instruction on surveying, installation and servicing techniques for Oxford's 'Voyager' range of overhead hoists and track. This course has been designed specifically to ensure all participants improve their overall product awareness and their technical capability with regards to surveying and installation of Voyager track systems.

Course aims:

To provide intensive instruction in the surveying, installation & servicing of the Oxford 'Voyager' product range.

Who should attend?

New and experienced engineers from authorised Oxford dealers, who have responsibility for the surveying, installation and servicing of Oxford 'Voyager' equipment.

Key features:

- Voyager track components and how and when they should be used
- Surveying & assessment techniques
- Installation techniques including fixing methods
- Practical group work on drawings, installation & assembly techniques
- Troubleshooting

Assessment:

A written test on the 2nd day. An 80% pass rate is required to successfully complete the course.

Duration:

2 days

Participants:

Max 12
